

Enmanuel Alexander Madrid Morales

Venezuela, Guayana City • enmanuelalx.com • +58 424 9628692 • hey@enmanuelalx.com

Senior Backend Engineer Python Specialist. Architect and builder of scalable systems using DDD, message queues, and event-driven architectures. Specialized in performance optimization, AI integration, and DevSecOps practices.

Professional Experience

Tech Lead | MO Technology.

Dec. 2021 – Present

- Reduced AI operation costs by 80% through token and tool call caching optimization strategies.
- Built async processing system handling 10k+ records per file in 10min using Python and message queues.
- Optimized critical API endpoints reducing response times by 30% through database query refactoring.
- Increased CI/CD pipeline efficiency by 40% implementing advanced automation and testing workflows.
- Architected event-driven systems using DDD patterns, message queues, and TDD methodology (Python).
- Developed AI agent for natural language data querying, enabling non-technical users to access business intelligence.

Software Engineer | MyTeam Abroad.

Jul. 2020 – Dec. 2021

- Developed ML models for automotive client: emotion detection via facial features and facial recognition for secure facility access.

Full Stack Developer | 789.mx.

Aug. 2019 – Nov. 2019

Developed package shipping modules and landing pages.

Backend Developer | Jam IT Solution.

Jun. 2017 – Aug. 2019

Developed and maintained ERP systems, refactoring core to apply SOLID principles and improve scalability.

Skills

Python, FastAPI/Flask, PostgreSQL/Redis, Message Queues (RabbitMQ/Kafka), Docker, Software Architecture, DDD, Design Patterns, Clean Architecture, CI/CD, DevSecOps, Node.js, AWS.

Education

Computer Engineer | Universidad Católica Andrés Bello (February 2020)
