

Enmanuel Alexander Madrid Morales

Venezuela, Guayana City • enmanuelalx.com • +58 424 9628692 • hey@enmanuelalx.com

Software engineer with a passion for challenges and continuous learning. Experienced in software architectures and design patterns, DevSecOps, and offensive security, developing quality solutions together with the team to deliver optimal and secure solutions.

Professional Experience

Tech Lead | MO Technology.

Dec. 2021 – Present

- Develop systems using domain-driven design with an architecture based on message queues and TDD methodology.
- Increased efficiency by 40% in critical processes within CI/CD pipelines.
- Built services capable of handling over 10 requests per second.
- Developed asynchronous processes for processing large files.
- Reduced response times by 30% on critical endpoints by optimizing database queries.
- Increased team performance by applying advanced prompt engineering techniques, workflows, and rules.
- Built an AI agent to enable users to query their data through natural language.

Software Engineer | MyTeam Abroad.

Jul. 2020 – Dec. 2021

- Worked in the innovation department for a client in the automotive sector, developing solutions using machine learning models.
- Created facial feature detection models to determine driver emotions.
- Trained and deployed a facial recognition model to enhance secure access control for office facilities.

Full Stack Developer | 789.mx.

Aug. 2019 – Nov. 2019

- Developed package shipping modules and landing pages.

Backend Developer | Jam IT Solution.

Jun. 2017 – Aug. 2019

- Developed and supported ERP systems, in addition to improving the core to apply SOLID principles and facilitate system scalability.

Skills

Python, Node.js, Docker, Software Architecture, Laravel, JavaScript, Databases, Design Patterns, Clean Architecture.

Education

Computer Engineer | Universidad Católica Andrés Bello (February 2020)
